INDEX OF AUTHORS VOLUME 12

A

ANDERSON, S. N. *See* PAULI, ANDERSON, MEMOLI and KUETTNER 419

B

BASSETT, J. R. and POLLARD, I. The involvement of coated vesicles in the secretion of corticosterone by the zona fasciculata of the rat adrenal cortex 101

BENNETT, C. E. *See* GLASSMAN, RYDZEWSKI and BENNETT 613

BERGQUIST, P. R. *See* GREEN, BERGQUIST and BULLIVANT 365

BIGNELL, D. E. An ultrastructural study and stereological analysis of the colon wall in the cockroach *Periplaneta americana* 153

BORG, T. K. and CAULFIELD, J. B. Morphology of connective tissue in skeletal muscle 197

BOUCHAUD, C. *See* HIRSCH, VERGE, BOUCHAUD and ESCAIG 437

BOUCAUD-CAMOU, E. Junctional structures in digestive epithelia of a cephalopod 395

BREININ, G. M. *See* DAVIDOWITZ, PHILIPS and BREININ 449, 459

BULLIVANT, S. *See* GREEN, BERGQUIST and BULLIVANT 365

C

CASLEY-SMITH, J. R. and VINCENT, A. H. Variations in the number and dimensions of tissue channels after injury 761

CASSENS, R. G. *See* SCHULTZ, CLARK, SUZUKI and CASSENS 323

CAULFIELD, J. B. *See* BORG and CAULFIELD 197

CHENG, M. *See* NAG, CHENG and HEALY 125

CLARK, A. W. *See* SCHULTZ, CLARK, SUZUKI and CASSENS 323

CLARK, A. W. and SCHULTZ, E. Rattlesnake shaker muscle: II. Fine structure 335

CLARK, W. H. *See* KLEVE, YUDIN and CLARK 29

CORMIER, S. M. and HESSINGER, D. A. Cellular basis for tentacle adherence in the Portuguese Man-of-War (*Physalia physalis*) 713

CRAGG, B. Preservation of extracellular space during fixation of the brain for electron microscopy 63

D

DAVID, H. L. *See* PETIT, DAVIS, JONES and HAGLER 13

DAVIDOWITZ, J., PHILIPS, G. and BREININ, G. M. The distribution of membrane-glycogen complexes in the orbital surface layer of rabbit superior rectus 459

DAVIDOWITZ, J., PHILIPS, G. and BREININ, G. M. Variation of mitochondrial volume fraction along multiply innervated fibers in rabbit extraocular muscle 449

DAVIS, L. *See* PETIT, DAVIS and JONES 581

DE POTTER, W. P., FRAEYMAN, N. H., PLUM, J. and DE SCHAEPDRYVER, A. P. Immunohistochemical evidence for a plasma membrane localization of dopamine-hydroxylase in the mouse neuroblastoma 227

DE SCHAEPDRYVER, A. P. *See* DE POTTER, FRAEMAN, PLUM and DE SCHAEPDRYVER 227

DEVILLEZ, E. J. *See* MICHEL and DEVILLEZ 673

DUVERT, M., GROS, D. and SALAT, C. Ultrastructural studies on the junctional complex in the musculature of the arrow-worm (*Sagitta setosa:* Chaetognatha). 1

DUVERT, M. and SALAT, C. The primary body-wall musculature in the arrow-worm *Sagitta setosa* (Chaetognatha): An ultrastructural study 723

E

EGUILEOR, M. DE, and FERRAGUTI, M. Architecture of the T-system in helical paramyosin muscles of an annelid (*Branchiobdella*) 739

EGUILEOR, M. DE, VALVASSORI, R. and LANZAVECCHIA, Discontinuity of sarcoplasmic reticulum in the mid-sarcomere region in flight muscle of dragonflies 749

ESCAIG, J. *See* HIRSCH, VERGE, BOUCHAUD and ESCAIG 437

F

FERRAGUTI, M. *See* EGUILEOR and FERRAGUTI 739

FILSHIE, B. K. and SMITH, D. S. A proposed solution to a fine-structural puzzle; The organization of grill cuticle in a crayfish (*Panulirus*) 209

FORBES, M. S. and SPERELAKIS, N. Structures located at the levels of the Z bands in mouse ventricular myocardial cells 467

FRAEMAN, N. H. *See* DE POTTER, FRAEMAN, PLUM and DE SCHAEPDRYVER 227

G

GERAUDIE, J. and MEUNIER, F-J, Elastoidin actinotrichia in coelacanth fins: A comparison with teleosts 637

GLASSMAN, A. B., RYDZEWSKI, R. S. and BENNETT, C. E. Trace metal levels in commercially prepared tissue culture media 613

GONIAKOWSKA-WITALINSKA, L. A. A peculiar mode of formation of the surface lining layer in larval lungs of *Salamandra salamandra* 539
GORDON, S. *See* ROTHSTEIN and GORDON 647
GOUDEAU, M. and LACHAISE, F. 'Endogenous yolk' as the precursor of a possible fertilization envelope in a crab (*Carcinus maenas*) 503
GOUDEAU, M. and LACHAISE, F. Fine structure and secretion of the capsule enclosing the embryo in a crab (*Carcinus maenas*) 287
GRAVIS, C. G. Ultrastructural observations on spermatozoa retained within the seminiferous epithelium after treatment with dibutyryl cyclic AMP 309
GREEN, L. F. B. Cryptonephric Malpighian tubule system in a dipteran larva, the New Zealand glow-worm *Arachnocampa luminosa* (Diptera: Mycetophilidae): A structural study 141
GREEN, L. F. B., BERGQUIST, P. R. and BULLIVANT, S. The structure and function of the smooth septate junctions in a transporting epithelium. The Malpighian tubules of the New Zealand glow-worm *Arachnocampa luminosa* 365
GROS, D. *See* DUVERT, GROS and SALAT 1
GROVER, N. B. and SHOSHAN, S. Three-dimensional organization of collagen fibres in tendon 523
GRYNSZPAN-WINOGRAD, O. and NICOLAS, G. Intercellular junctions in the adrenal medulla: A comparative freeze-fracture study 661

H

HAGLER, H. K. *See* PETIT, DAVIS, JONES and HAGLER 13
HEALY, C. J. *See* NAG, CHENG and HEALY 125
HESSINGER, D. A. *See* CORMIER and HESSINGER 713
HINSCH, G. W. Spermiogenesis in a hermit-crab *Coenobota clypeatus*. II. Sertoli cells. 255
HIRSCH, M., VERGE, D., BOUCHAUD, C. and ESCAIG, J. The tight junctions of rabbit choroid plexus and ciliary body epithelia, A comparative study using the double replica freeze-fracture technique 437
HORI, I. Localization of newlt synthesized precursors of basal lamina in the regenerating planarian as revealed by autoradiography 513
HUEBNER, E. *See* LOCOCO and HUEBNER 557
HUEBNER, E. *See* LOCOCO and HUEBNER 795
HUEBNER, E. *See* LUTZ and HUEBNER 773
HUIE, P. *See* LOCKE and HUIE 175

J

JOHNSON, B. An electron microscopic study of flight muscle breakdown in an aphid *Megoura viciae* 529
JONES, R. G. *See* PETIT, DAVID and JONES 581
JONES, R. G. *See* PETIT, DAVIS, JONES and HAGLER 13

K

KALLENBACH, E. Access of horseradish peroxidase (HRP) to the extracellular spaces of the maturation zone of the rat incisor enamel organ 165
KALLENBACH, E. Fate of horseradish peroxidase in the secretion zone of the rat incisor enamel organ 491
KLEVE, M. G., YUDIN, A. I. and CLARK, W. H. Fine structure of the unistellate sperm of the shrimp *Sicyonia ingentis* (Natantia) 29
KOVOOR, J. and ZYLBERBERG, L. Fine structural aspects of silk secretion in a spider (*Araneus diadematus*). I. Elaboration in the pyriform glands 547
KOWAL, J. *See* MATTSON and KOWAL 685
KUETTNER, K. E. *See* PAULI, ANDERSON, MEMOLI and KUETTNER 419

L

LACHAISE, F. *See* GOUDEAU and LACHAISE 287
LACHAISE, F. *See* GOUDEAU and LACHAISE 503
LANZAVECCHIA, G. *See* EGUILEOR, VALVASSORI and LANZAVECCHIA 749
LOCKE, M. and HUIE, P. The nucleolus during epidermal development in an insect 175
LOCOCO, D. and HUEBNER, E. The development of the female accessory gland in the insect *Rhodnius prolixus* 795
LOCOCO, D. and HUEBNER, E. The ultrastructure of the famale accessory gland, the cement gland, in the insect *Rhodnius prolixus* 557
LUTZ, D. A. and HUEBNER, E. Development and cellular differentiation of an insect telotrophic ovary (*Rhodnius prolixus*) 773

M

MALONE, J. D. P. *See* RUSSELL and MALONE 263
MATRICON-GONDRAN, M. Gap-junctions and particle aggregates in the tegumentary syncytium of a trematode 385
MATTSON, P. and KOWAL, J. Acute steroidogenic stimulation of cultured adrenocortical tumor cells: An electron microscopic analysis 685
MAXWELL, D. J. Histochemical properties of axons associated with the salivary apparatus of the cockroach, *Nauphoeta cinerea* 703
MEMOLI, V. A. *See* PAULI, ANDERSON, MEMOLI and KUETTNER 419
MEUNIER, F-J. *See* GERAUDIE and MEUNIER 637
MICHEL, C. and DEVILLEZ, E. J. Cuticle and mucous glands in the oesophagus of an annelid (*Nereis virens*) 673
MORTARA, M. *See* RYAN, MORTARA and WHITAKER 619

N

NAG, A. C., CHENG, M. and HEALY, C. J. Studies of adult amphibian heart cells *in vitro:* DNA synthesis and mitosis 125
NELSON, L., VAN DER LANDE, V. and ROBSON, E. A. Fine structural and histochemical studies on salivary glands of *Peripatoides novae-zealandiae* (Onychophora) with special reference to acid phosphatase distribution 405
NICKERSON, P. A. Effect of estradiol-17α and diethylstilbestrol on adrenal cortex and anterior pituitary gland of the Monogolian gerbil 117

NICOLAS, G. *See* GRYNSZPAN-WINOGRAD and NICOLAS 661
NISHIMURA, M. S. and NISHITSUTSUJI-UWO, J. Sporeless mutants of *Bacillus thuringensis*. III. The process of crystal formation 233
NISHITSUTSUJI-UWO, J. *See* NISHIMURA and NISHITSUTSUJI-UWO 233

P

PAULI, B. U., ANDERSON, S. N., MEMOLI, V. A. and KUETTNER, K. E. The isolation and characterization *in vitro* of normal epithelial cells, endothelial cells and fibroblasts from rat urinary bladder 419
PETIT, H., DAVIS, L. and JONES, R. G. A scanning electron microscopic study of the inorganic and organic matrices comprising the mature shell of *Amblema*, a fresh-water mollusc 581
PETIT, H., DAVIS, W. L., JONES, R. G. and HAGLER, H. K. Morphological studies on the calcification process in the fresh-water mussel *Amblema* 13
PHILIPS, G. *See* DAVIDOWITZ, PHILIPS and BREININ 449, 459
POLLARD, I. *See* BASSETT and POLLARD 101

ZYLBERBERG, L. *See* KOVOOR and ZYLBERBERG 547

INDEX OF SUBJECTS VOLUME 12

A

Acid phosphatase, distribution of, in salivary glands of *Peripatoides*, fine structural and histochemical studies, 405
Actinotrichia, elastoidin, in coelacanth fins, a comparison with teleosts, 637
Adrenal cortex, in Mongolian gerbil, 117
—, in rat, 101
— —, medulla, intercellular junctions in, 661
Aiptasia pallida, anthozoan, spermiogenesis in, 243
Amblema, fresh-water mollusc, calcification in, 13
—, fresh-water mollusc, matrices of mature shell in, 581
Amphibian, heart cells of, *in vitro*, DNA synthesis and mitosis, 125
—, *Salamandra salamandra*, larval, lining layer in lungs of 539
Annelid, *Branciobdella*, architecture of the T-system in helical paramyosin muscles of, 739
—, *Nereis virens*, cuticle and mucous glands in the oseophagus of, 673
Anthozoan, *Aiptasia pallida*, spermiogenesis in, 243
Arachnid, spider, silk secretion in, elaboration in the pyriform glands, 547
Arachnocampa luminosa, New Zealand glow-worm, Malpighian tubule system in larval. A structural study, 141
— —, New Zealand glow-worm, smooth septate junction in, 365
Araneus diadematus, spider, silk secretion in, 547
Autoradiography, of basal lamina precursors, 513

B

Bacillus thuringensis, sporeless mutants of. The process of crystal formation in, 233
Bacterium, *Bacillus thuringensis*, sporeless mutants of, 233
Basal lamina, regenerating, localization of precursors in, in a planarian, as revealed by autoradiography, 513
Bioluminescence, in New Zealand glow-worm, 141
Bird, chick, membrane alterations during neural retina development in, 353
—, myoblasts, intracellular filament bundles in, 595
Bouvine cells, cultured, pulmonary endothelial, 619
Brain, extracellular space of, preservation of during fixation 63

C

Calcification, in fresh-water mussel *Amblema*, 13
Carcinus maenas, crab, 'endogenous yolk' as precursor of a possible fertilization envelope in, 503
— —, crab, secretion of embryonic capsule in, 287
Chaetognath, *Sagitta setosa*, musculature of, 1
Circulatory system, microcarrier culture of bovine pulmonary artery endothelial cells, 619
Coated vesicles, involvement of in secretion of corticosterone in rat adrenal cortex, 101
Coelacanth, fins of, elastoidin in, 637
Coelenterate, anthozoan, spermiogenesis in, 243
—, *Physalia*, tentacle adherence in, 713
Coenobita clypeatus, hermit-crab, spermiogenesis in, 255
Collagen, fibres, in tendon, organization of, 523
Connective tissue, in skeletal muscle, morphology of, 197
Corneal growth and repair, studies on, increased transcription as detected by incorpoartion of ^{3}H-uridine and ^{3}H-actinomycin D, 647
Corticosterone, secretion of, in rat adrenal cortex, involvement of coated vesicles in, 101
Cnidoblast, in *Physalia*, role of, in tentacle adherence, 713
Crustacean, crab, *Carcinus maenas*, capsule enclosing the embryo in, 287
—, —, 'endogenous yolk' as the precursor of a possible fertilization envelope, 503
—, crayfish *Panulirus*, organization of gill cuticle in, 209
—, hermit-crab, spermiogenesis in, 255
—, *Orchestia gammarellus*, oogenesis in, 47
—, *Sicyonia ingentis*, unistellate sperm of, 29
Cryoprotectants, cryofixation without. Freeze substitution and freeze etching of an insect olfactory receptor, 73
Crystal formation, process of, in *Bacillus thuringensis*, 233
Cuticle, and mucous glands in the oesophagus of an annelid, 673
—, gill, in a crayfish *Panulirus*, a proposed solution to a fine-structural puzzle in, 209

D

Development, chick neural retina, membrane alterations during, 353
Dibutyryl cyclic AMP, spermatozoa retained within the seminiferous epithelium after treatment with, 309
Diethylstilbestrol and estradiol-17α, effect of, on adrenal cortex and anterior pituitary gland, 117

Digestive epithelia, of a cephalopod, junctional structures in, 395
DNA synthesis, and mitosis, in cultured amphibian heart cells, 125
Dopamine β-hydroxylase, plasma membrane localization of, in mouse neuroblastoma, immunohistochemical evidence for, 227

E

Elastoidin, in actinotrichia of coelacanth fins, a comparison with teleosts, 637
Embryo, in a carb, secretion of capsule enclosing, 287
Enamel organ, of rat, access of HRP to extracellular spaces of maturation zone of, 165
—, of rat, fate of HRP in the secretion zone of, 491
Endothelial and epithelial cells, and fibroblasts, from rat urinary bladder, isolation and characterization *in vitro* of, 419
Endothelial cells, bovine pulmonary, methods for microcarrier culture of, 619
Enzymes, methods for avoiding use of, in microcarrier culture, 619
Epidermal development, in an insect, role of nucleolus during, 175
Estradiol-17, and diethylstilbestrol, effect on adrenal cortex and anterior pituitary of, 117
Excretory system, colon wall in *Periplaneta*, stereological analysis of, 153
— —, Malpighian tubule of an insect, structural study, 141
— —, rat urinary bladder, *in vitro* isolation and characterization of cell types from, 419
Extracellular space, in brain, preservation of, 63
— —s, of maturation zone of rat incisor enamel organ, access of HRP to, 165
Eye, chick neural retina development, 353
—, rabbit, extraocular muscle of, 449
—, rabbit, superior rectus muscle of, 459
—, rabbit, tight junctions in choroid plexus and ciliary body epithelia in, 437
—, studies on corneal growth and repair, incorporation of ^{3}H-uridine and ^{3}H-actinomycin D, 647

F

Fertilization envelope, 'endogenous yolk' as precursor for, 503
Fibres, collagen, in tendon, three dimensional organization of, 523
Fibroblasts, and epithelial and endothelial cells, normal, from rat urinary bladder, isolation and characterization of, 419
Filament bundles, intracellular, in whole mounts of chick and human myoblasts, 595
Fish, coelacanth and teleost, elastoidin in, 637
Fixation, cryo-, without cryoprotectants, 73
—, of the brain, preservation of extracellular space during, 63
Freeze etching, and freeze substitution of insect receptor, 73
Freeze fracture, of crustacean cuticle 209
— —, comparative, of intercellular junctions in the adrenal medulla, 661
— —, of digestive epithelia of a cephalopod, 395
— —, of junctional complex in muscle of arrow-worm, 1
— —, of rabbit choroid plexus and ciliary body, tight junctions in. 437
— —, of tegumentary syncytium of a trematode, 385
— —, smooth septate junction in an insect, 365
— —, using double recovery technique, 437
Freeze substitution, and freeze etching of insect receptor, 73

G

Gap junctions, and particle aggregates in the tegumentary syncytium of a trematode, 385
Gerbil, Mongolian, adrenal cortex and anterior pituitary of, 117
Gill cuticle, organization of, in a crayfish, 209
Gland, adrenal, 101, 117,
—, cement, female accessory, in an insect, 557
—, female accessory, development of, in an insect, 795
—s, mucous, and cuticle, in the oesophagus of an annelid *Nereis virens*, 673
—, pyriform, silk-secreting, in a spider, 547
—, salivary, acid phosphatase distribution in, 405
—, salivary, of a cockroach, histochemical properties of axons associated with, 703

H

^{3}H-actinomycin D, in studies on corneal growth and repair, 647
Hamster, seminiferous epithelium of, 309
High-voltage EM, of whole mounts of myoblasts extracted with Triton X-100, 595
Hormone, acute steriodogenic stimulation of cultured adrenocortical tumor cells, 685
—, corticosterone, in rat, 101
—, estradiol-17α and diethylstilbestrol, 117
Horseradish peroxidase, access of, to extracellular space of rat incisor enamel organ, 165, 491
— —, fate of, in the secretion zone of the rat incisor enamel organ, 491
— —, in an insect transporting epothelium, 365
^{3}H-uridine, in studies on corneal growth and repair, 647

I

Insect, aphid, *Megoura viciae*, flight muscle breakdown in, 529
—, *Calpodes ethlius*, epidermal development in, 175
—, dragonfly, flight muscel of, 749
—, *Nauphoeta*, axons associated with the salivary apparatus in, 703
—, New Zealand glow-worm, *Arachnocampa luminosa*. A structural study of Malpighian tubles in, 141
— ,—, structure and function of smooth septate junction in Malpighian tubles of, 365

—, *Periplaneta americana*, stereological analysis of colon wall in, 153
—, olfactory receptor of, freeze substitution and freeze etching of, 73
—, *Rhodnius*, development of female accessory gland in, 795
— —, telotrophic ovary of, 773
— —, ultrastructure of cement gland in, 557
Intercellular markers, for EM studies, 165, 365, 395, 491, 761

J

Junction, gap, in a cephalopod digestive epithelium, 385
— —, in tegument of a trematode, 385
—, pleated septate, in a cephalopod, 395
—, smooth septate, in a transporting epithelium, 365
Junctional complex, in musculature of the arrow-worm (*Sagitta setosa*), ultrastructural studies on, 1
Junctions, intercellular, in the adrenal medulla, 661
—, tight, of rabbit choroid plexus and ciliary body epithelia, 437

L

Lungs, larval, of *Salamandra*, formation of surface lining layer in, 539

M

Malpighian tubule, of New Zealand glow-worm, A structural study, 141
— — — — — —, smooth septate junction in, 365
Matrices, inorganic and organic, comprising the mature shell of a mollusc, SEM study, 581
Media, tissue culture, trace metal levels in commercially prepared, 613
Megoura viciae, aphid, muscle breakdown in, 529
Membrane, alterations during chick neural retina development, 353
—, plasma, localization of dopamine β-hydroxylase on, 227
—, -glycogen complexes, distribution of, in the orbital surface layer of rabbit superior rectus, 459
Microcarrier culture, of pulmonary artery endothelial cells, methods for, avoiding use of enzymes, 619
Mitochondria, of rabbit extraocular muscle, variation of volume fraction along, 449
Mitosis, and DNA synthesis, in amphibian heart cells *in vitro*, 125
Mollusc, *Amblema*, calcification process in, 13
— —, matrices comprising the mature shell in, 581
—, cephalopod, junctional structures in digestive epithelia of, 395
Mouse, cardiac muscle, ventricular myocardial cells of, 467
—, neuroblastoma, 227
Muscle, annelid (*Branchiobdella*), helical paramyosin, architecture of T-system in, 739
—, cardiac, adult amphibian *in vitro*, DNA synthesis and mitosis, 125
— —, mouse, structures located at the levels of the Z bands in, 467
—, dragonfly flight, discontinuity of SR in, in the mid-sarcomere region, 749
—, extraocular, rabbit, variation of mitochondrial volume fraction along multiply innervated fibres of, 449
—, flight, of an aphid *Megoura viciae*, EM study of breakdown in, 529
—, skeletal, morphology of connective tissue in, 197
—, of the arrow-worm, primary body-wall musculature, 723
— — — —, junctional complex in, 1
—, rabbit superior rectus, membrane-glycogen complexes in, 459
—, rattlesnake shaker, fine structure of, 335
— —, light microscopic and histochemical study, 323
Mutants, sporeless, of *Bacillus thuringensis*,. crystal formation in, 233
Myelin, tubular, in amphibian lung, 539
Myoblasts, chick and human, extracted with Triton X-100, intracellular filament bundles in, 595

N

Nauphoeta cinera, cockroach, histochemical properties of axons associated with the salivary apparatus of, 703
Nereis virens, annelid, cuticle and mucous glands of, 673
Nervous system, axons associated with the salivary apparatus of a cockroach, histochemical properties of, 703
— —, chick neural retina development, 353
— —, multiply innervated fibres of rabbit extraocular muscel, 449
— —, preservation of extracellular space during fixation of the brain for electron microscopy, 63
— —, —, rabbit choroid plexus and ciliary body epithelia, tight junctions in, 437
— —, —, freeze substitution and freeze etching of an insect olfactory receptor, 73
Nucleolus, during epidermal development in an insect, 175

O

Oesophagus, of an annelid, cuticle and mucous glands in, 673
Onychophoran, *Peripatoides*, fine structural and histochemical studies on salivary glands of, 405
Oogenesis, in the crustacean *Orchestia*, ultrastructural observations on, 47
Orchestia gammarellus, amphipod, oogensis in, 47
Ovary, telotrophic, of an insect, development and cellular differentiation in, 773

P

Panulirus, crayfish, gill cuticle in, 209
Paramyosin, helical, of an annelid *Branchiobdella*, T-system in, 739
Peripatoides novae-zealandiae, salivary glands of, 405

Pituitary, anterior, of the Mongolian gerbil, 117
Planarian, precursors of basal lamina precursors in, 513
Plasma membrane, immunohistochemical evidence for localization of dopamine β-hydroxylase on, in mouse neuroblastoma, 227
Portuguese Man-of-War, (*Physalia*), cellular basis for tentacle adhesion in, 713
Pyriform glands, in a spider, silk-secretion by, 547

R

Rat, adrenal cortex, zona fasciculata of, 101
—, incisor enamel organ of, 165, 491
—, urinary bladder, *in vitro* culture of cell types from, 419
Rattlesnake, shaker muscle, fine structure of, 335
—, — —, light microscopic and histochemical study, 323
Rabbit, choroid plexus and ciliary body, 437
—, extraocular muscle, mitochondrial volume fraction in, 449
—, superior rectus muscle, membrane-glycogen complexes in, 459
Receptor, olfactory, of an insect, 73
Regeneration, of basal lamina, in a planarian, autoradiographic study, 513
Reproductive system, development and cellular differentiation of an insect telotrophic ovary, 773
— —, development of the female accessory gland in the insect *Rhodnius prolixus*, 795
— —, 'endogenous yolk' as precursor of fertilization envelope in a crab, 503
— —, Fine structure of the unistellate sperm of the shrimp Sicyonia ingentis (Natantia), 29
— —, oogenesis in the crustacean amphipod *Orchestia gammarellus*, 47
— —, secretion of the capsule enclosing the embryo in a crab, 287
— —, spermatozoa retained within the seminiferous epithelium after treatment with dibutyryl cAMP, 309
— —, spermiogenesis in an anthozoan, 243
— —, spermiogenesis in a hermit-crab, 255
— —, study of Sertoli-spermatid tubulobulbar complexes in selected mammals, 263
— —, ultrastructure of female accessory gland, the cement gland, in an insect, 557
Reptile, rattlesnake, shaker muscle of, fine structure of, 335
—, —, shaker muscle of, light microscopic and histochemical study, 323
Retina, neural, development of in chick, membrane alterations during, 353
Rhodnius, insect, 557, 773, 795

S

Sagitta setosa (Chaetognatha), junctional complex in muscle of, 1
— — —, primary body-wall musculature in, 723
Salamandra, amphibian, formation of surface lining layer in larval lungs of, 539
Salivary glands, of *Peripatoides*, with special reference to acid phosphatase distribution, 405
Sarcoplasmic reticulum, discontinuity of in the mid-sarcomere region, in dragonfly flight muscle, 749
Secretion, of corticosterone, by zona fasciculata of the rat adrenal cortex, 101
—, of the capsule enclosing the embryo of a crab, 287
—, silk-, fine structural apsects of, in a spider *Araneus diadematus*, 547
Sertoli cells, in a hermit-crab, 255
— —, in mammals, 263
Shell, of mollusc, fine structural studies on, 13, 581
Shrimp, *Sicyonia*, sperm of, 29
Sicyonia, fresh-water shrimp, sperm of, 29
Silk-secretion, by pyriform glands in a spider, 547
Skeletal muscle, morphology of connective tissue in, 197
Sperm, unistellate, fine structure of, in the shrimp, *Sicyonia ingentis* (Natantia), 29
Spermatids, complexes with Sertoli cells, in mammals, 263
Spermatozoa, retained within the seminiferous epithelium after treatment with dibutyryl cAMP, 309
Spermiogenesis, in a hermit-crab *Coenobita clypeatus*, Sertoli cells, 255
—, in the anthozoan *Aiptasia pallida*, 243
Stereological analysis, of colon wall in the cockroach *Periplanta americana*, 153
— —, variation of mitochondrial volume fraction along multiply innervated fibers in rabbit eye muscle, 449
Syncytium, tegumentary. of a trematode, gap-junctions and particle aggregates in, 385

T

T-system architecture of, in an annelid helical paramyosin muscle, 739
Teeth, rat incisor enamel organ, 165, 491
Tendon, collagen fibres in, three dimensional organization of, 523
Tissue channels, variation in number and dimensions of, after injury, 761
— —, culture, adrenocortical tumor cells, acute steroidogenic stimulation of, an EM analysis, 685
— —, of adult amphibian heart cells, 125
— —, of bovine pulmonary artery cells, avoiding use of enzymes, 619
— —, chick and human myoblasts extracted with Triton X-100, 595
— —, of epithelial cells, endothelial cells and fibroblasts from rat urinary bladder, 419
— —, mouse neuroblastoma, 227
— —, media, trace metal levels in commercially prepared, 613
Trace metals, levels of, in tissue culture media, 613

Trematode, gap-junctions in tegumentary syncytium of, 385
Triton X-100, whole mounts of chick and human myoblasts extracted with, HVEM study, 595
Tubulobulbar complexes, in selected mammals, 263
Tumor cells, adrenocortical, steroidogenic stimulation of, 685

U

Unistellate sperm, in the shrimp *Sicyonia*, 29

V

Vesicles, coated, involvement of in secretion of corticosterone, 101

Y

Yolk, endogenous, in a crab, precursor of a possible fertilization envelope in, 503

Z

Z bands, of mouse ventricular myocardial cells, structures located at, 467
